

Course Development and Resources Procedure

RELEVANT STANDARD(S):

Standards for Registered Training Organisations (RTOs) 2025	<i>Outcome Standards relating to:</i> • QA1 – Quality and integrity of training and assessment • QA4 – Governance, monitoring and continuous improvement • Learner protection and engagement outcomes (where applicable)
---	---

Procedure Overview

PURPOSE	The purpose of this procedure is to outline the systematic process used by SNS College of Western Australia Pty Ltd (RTO Code 53034) to design, develop, review, amend and transition training products and associated assessment systems. This procedure ensures that: • training and assessment systems are fit-for-purpose and outcome focused; • assessment integrity and learner outcomes are protected; • changes are risk-assessed and governed appropriately; and • continuous improvement is embedded across the product lifecycle. This procedure also ensures that learners are not disadvantaged by uncontrolled change, outdated materials, or misaligned delivery or assessment arrangements.
ROLE UNDERTAKING TASK	The Training Manager has authority to approve minor, low-risk changes that do not materially impact: • learner outcomes or access, • assessment design or integrity, • delivery mode or resourcing model, or • regulatory or licensing obligations.
DOCUMENT UPDATE	Changes proposed via Continuous Improvement (CI) Register. Minor updates approved by Training Manager; material changes (scope, resourcing model, assessment system) approved by CEO. Review cycle: annual or on product/package/version changes. Supporting Forms & Templates - Course Development Request Form (SNS-CD-REQ-YYYY-###) - Validation Risk Matrix & Triggers (sets sampling depth/frequency) - Validation Risk Register (per product) - Course Resource Checklist - Pre-Assessment Validation Checklist - TAS Template, Assessment Plan Template, Mapping Matrix Repository & Folder Standard All approved materials are stored in the controlled repository (SharePoint) using:

	`01-Assessments / 02-Student Resources / 03-Trainer Resources / 04-Mapping / 05-Validation / 06-TAS / 07-Archive`. Footer on exports: "Controlled copy when viewed on SharePoint Uncontrolled when printed".
Procedure Overview	Single Project Plan / Development Tracker SNS College of Western Australia applies a single Project Plan / Development Tracker to manage both New Course Development and Course Maintenance / Change activities. The tracker uses the same staged lifecycle (Plan → Analyse & Design → Review → Implement) and mandatory controls for all training products, ensuring consistent governance, assessment quality and regulatory compliance. The difference between development and maintenance is determined by the trigger and scope of change, not by the process applied. This procedure is organised into three parts: 1. Course Development (Pre-delivery design) – cohort, industry engagement, TAS, assessment plan. 2. Resourcing & Facilities Assurance – trainers, support services, learning resources, facilities/equipment. 3. Readiness, Commencement & Monitoring – final checks, authorisation, in-delivery moderation and improvement.

Definitions

New Course Development

The structured planning, design, validation and resourcing of a **new training product** (qualification, skill set or unit) that is not currently approved for delivery by SNS College of Western Australia, or where changes are so substantial that a new development lifecycle is required.

New Course Development is initiated through a Course Development Request and managed using the Project Plan / Development Tracker.

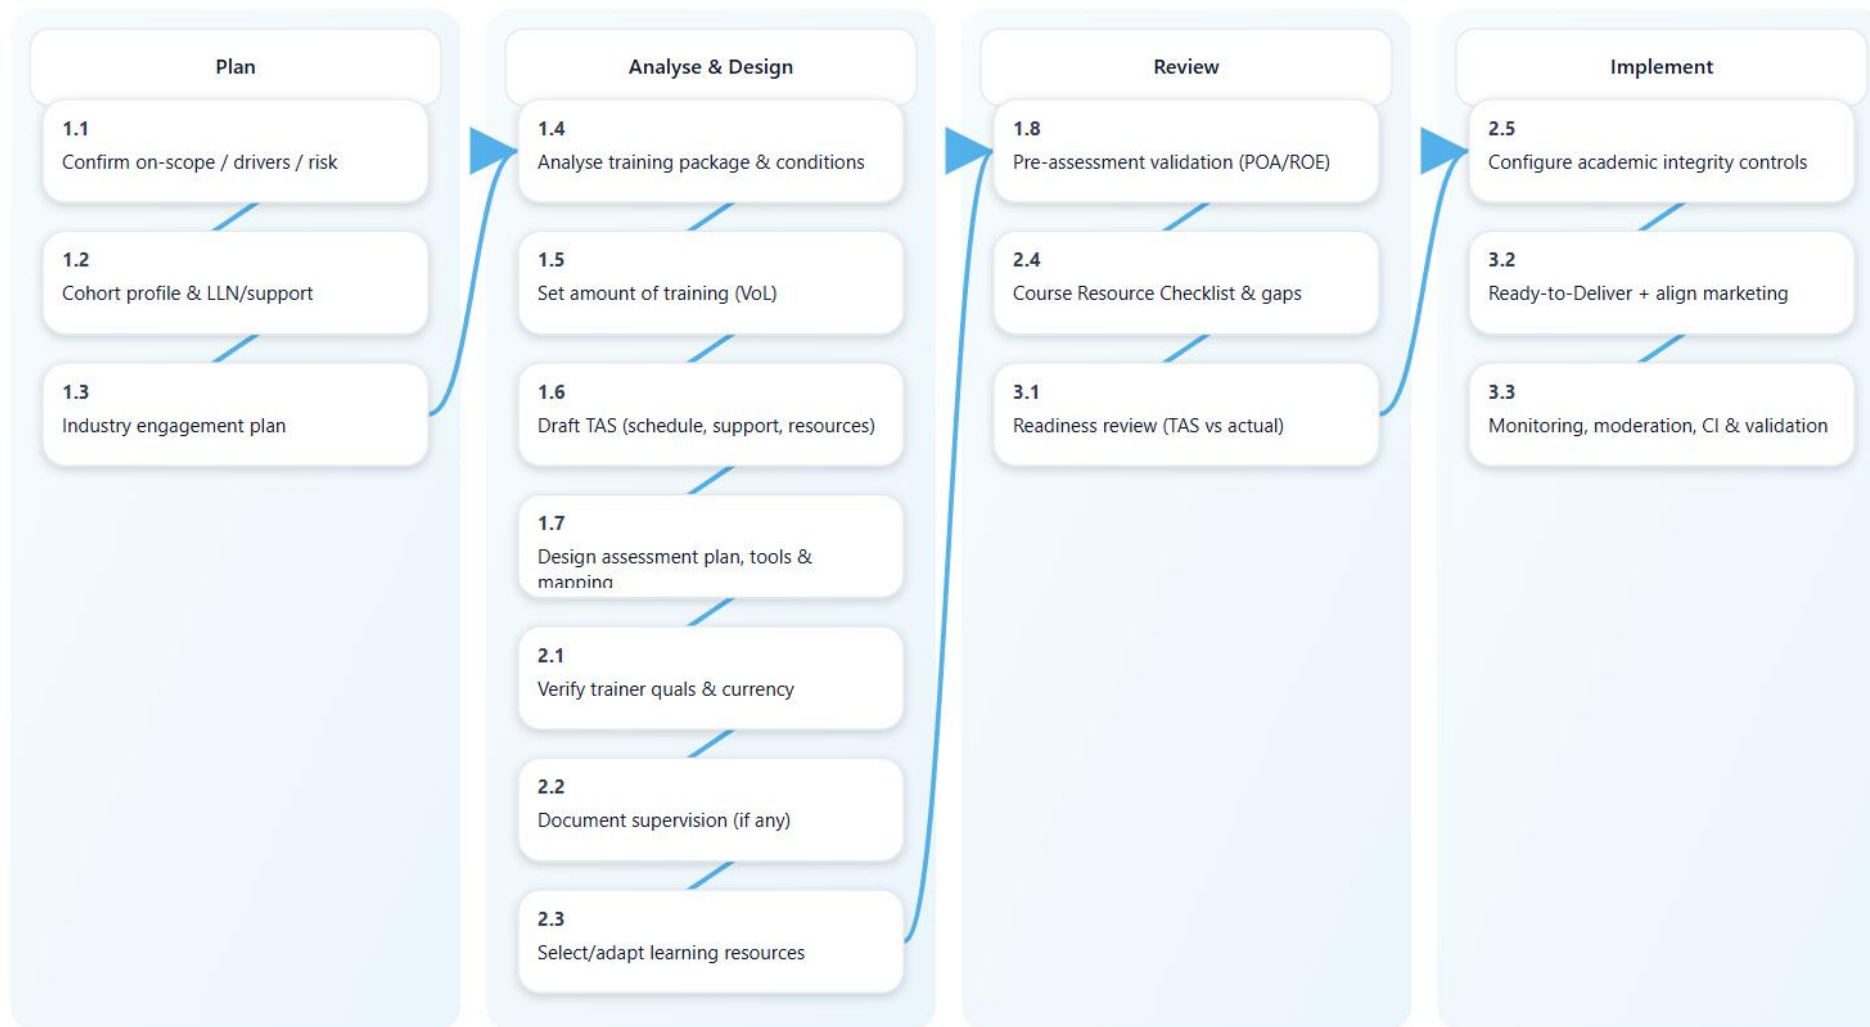

Course Maintenance / Change

The controlled review and amendment of an **existing training product** initiated through a Continuous Improvement (CI) item, validation outcome, audit finding, industry feedback, regulatory change or incident, where one or more components of the training product are updated **without creating a new training product**.

Course Maintenance activities are managed using the same Project Plan / Development Tracker, with the CI reference number recorded as the trigger.

Material Change

A change that may reasonably impact learner outcomes, assessment integrity, delivery commitments, regulatory compliance, or organisational risk exposure, and which requires CEO approval prior to implementation.

Step	Action	Responsibility	Records / Evidence
Intake & Project Setup.			
0.1	Initiate Project Plan / Development Tracker A Project Plan / Development Tracker is initiated for all New Course Development and Course Maintenance / Change activities. - For New Course Development, a Course Development Request Form is raised and referenced in the tracker. - For Course Maintenance / Change, the relevant Continuous Improvement (CI) reference number is recorded in the tracker header. The driver for the activity (e.g. audit, validation, industry feedback, regulatory change, incident or client request) is identified at initiation.	Initiator Training Manager	Project Plan / Development Tracker; Course Development Request Form (New Development) OR CI Register reference (Maintenance)
0.2	Complete Preliminary Risk Assessment The Training Manager and Compliance Officer complete a preliminary risk assessment using the Validation Risk Matrix & Triggers to determine validation depth and sampling requirements. The risk rating considers the nature of the activity (development or maintenance), the type of change, and the components impacted (e.g. TAS, assessment tools, resources, delivery model). Confirm whether the change impacts learner information, suitability screening, support arrangements, fees/refunds, delivery promises or assessment conditions. Where learner impact is identified, required communication, transition and implementation controls must be planned and recorded.	Training Manager + Compliance	Validation Risk Register entry
0.3	Establish Project Plan / Development Tracker and Repository The Training Manager establishes the Project Plan / Development Tracker, confirming milestones, responsibilities, dependencies and timelines aligned to the lifecycle stages (Plan → Analyse & Design → Review → Implement). A controlled repository location is created in accordance with the approved folder structure, and all development or maintenance artefacts are stored as controlled copies.	Training Manager	Project Plan / Development Tracker; Repository path
1. Course Development (Pre-delivery design)			
1.1	Confirm scope, drivers and risk	Training Manager	Scope extract/screenshot; Opportunity brief; Risk rating

Step	Action	Responsibility	Records / Evidence
	Confirm the training product is on scope (or commence scope addition where required). Identify the driver for the activity (e.g. new demand, transition, validation outcome, audit finding, industry feedback, regulatory change or client request) and confirm the risk rating recorded in the Project Plan / Development Tracker.		
1.2	Profile target cohort Profile the target cohort, including entry requirements, prerequisites, LLN and support needs, and delivery locations and modes. For maintenance activities, confirm whether proposed changes impact existing cohorts or support arrangements.	Training Manager + Compliance	Cohort profile; Entry requirements note; PTR/LLN tools
1.3	Plan industry engagement Plan and undertake industry engagement (e.g. 2–3 contacts through interviews, surveys or advisory input) to inform delivery and assessment conditions. For maintenance activities, industry engagement is undertaken where changes impact job outcomes, assessment conditions, equipment, or delivery context.	Training Manager	Industry engagement plan; Invitations; Minutes
1.4	Analyse training package and regulatory requirements - Analyse the training package requirements, including packaging rules, units, assessment conditions, and any licensing or regulatory requirements. - Confirm unit currency and manage transitions and teach-out in accordance with the transition requirements of the Standards for RTOs 2025. - For maintenance activities, analysis focuses on changes or impacts since the previous approved version.	Compliance Officer	Training package extract; Analysis notes
1.5	Set or review amount of training Set the amount of training aligned to AQF Volume of Learning and justify any adjustments for cohort characteristics, RPL or credit transfer.	Training Manager	VoL calculator; Rationale

Step	Action	Responsibility	Records / Evidence
	For maintenance activities, review the existing amount of training and confirm whether changes are required.		
1.6	Draft or update TAS Draft (or update, for maintenance activities) the Training and Assessment Strategy, including cohort characteristics, delivery schedule and sequence, modes, assessment plan, support services, resources and facilities, and supervision arrangements (if applicable).	Training Manager	TAS v0.1; TAS approval routing
1.7	Assessment design - Design assessment plans and tools, including assessment methods, tasks, approved benchmarks, and mapping matrices (knowledge evidence, performance evidence and assessment conditions). Assessment tools must include academic integrity instructions. - Refer to Sub-Process “Design Assessment Plan & Tools (Methods, Benchmarks, Mapping, Integrity)” for detailed DA1–DA4 steps and the approved templates used in assessment development. - Assessment tools must include approved assessor benchmarks (e.g. marking guides and observation criteria). Assessors must not add, remove or reinterpret assessment criteria. Competency decisions must be made solely against the validated benchmarks and recorded evidence. - Scenario contextualisation and reasonable adjustment must not alter the assessment intent, level of complexity, required conditions, or mapped performance and knowledge evidence. Any modification must be documented and confirmed through validation or approval by the Training Manager. - All assessment design decisions, constraints and approvals are recorded and tracked within the Project Plan / Development Tracker.	Lead Assessor	Assessment plan; Tool set; Mapping matrices; Integrity statement

Step	Action	Responsibility	Records / Evidence
1.8	Conduct Pre-assessment Validation Conduct pre-assessment validation against the Principles of Assessment and Rules of Evidence. Record findings, actions and approvals, and close all required items prior to progressing to readiness review.	Assigned Validator	Validation checklist; Minutes; Action log; CI links
2. Resourcing & Facilities Assurance			
2.1	Verify trainer and assessor suitability Verify that trainers and assessors allocated to the training product meet credential, vocational competence and industry currency requirements relevant to the specific product. For maintenance activities, confirm that existing trainer/assessor suitability remains appropriate following the change.	Compliance Officer	Trainer Compliance Register; CVs; PD/Currency records
2.2	Document supervision arrangements (if required) Where supervision is required under Clause 1.20, document the supervision level, scope, restrictions and monitoring arrangements. For maintenance activities, review supervision arrangements to confirm continued suitability following any changes to delivery or assessment.	Training Manager	Supervision plan; TAS section; Staff brief
2.3	Select or adapt learning resources Select or adapt learning resources that are copyright compliant and aligned to the approved TAS, assessment tools and assessment conditions. WHS and accessibility requirements must be explicitly checked. For maintenance activities, review existing resources and update only those impacted by the change.	Lead Trainer	Resource list; Licences/permissions; Version log
2.4	Complete Course Resource Checklist and resolve gaps Complete the Course Resource Checklist to confirm class sizes, trainer-to-learner ratios, rooms or LMS access, and required equipment. Any gaps are addressed through procurement or IT requests prior to readiness review.	Admin + Trainer	Completed checklist; Bookings; Procurement/IT requests

Step	Action	Responsibility	Records / Evidence
2.5	Configure academic integrity controls Configure academic integrity controls relevant to the training product and assessment methods, including candidate declarations, identity verification, plagiarism or originality checks, and LMS settings. Controls must be active prior to assessment use and reviewed for maintenance activities where assessment methods or delivery modes change.	Compliance + IT/LMS Admin	Candidate declaration; LMS settings; ID check procedure
3. Readiness, Commencement & Monitoring			
3.1	Perform Readiness Review (mandatory gate) Perform a Readiness Review to confirm that approved arrangements align with the Training and Assessment Strategy (TAS) and the Project Plan / Development Tracker. This includes verification of timetables, staff allocation, rooms and equipment, assessment tools in the LMS, and visibility of support and appeals information. The Readiness Review must confirm: ☐ Final assessment tools uploaded (student and assessor versions) ☐ Marking guides and assessor benchmarks confirmed ☐ Mapping matrices complete and current ☐ Assessment conditions aligned to the TAS ☐ Academic integrity controls active For maintenance activities, the review focuses on confirming that amended components are correctly implemented and that unaffected components remain current.	Training Manager	Readiness review form; Links/screenshots; Sign-off
3.2	Issue "Ready to Deliver" authorisation Following successful completion of the Readiness Review, issue formal "Ready to Deliver" authorisation.	CEO / Training Manager	Authorisation memo; Final web copy; Fee schedule

Step	Action	Responsibility	Records / Evidence
	- Authorisation is approved by the Training Manager, and by the CEO where required (e.g. new product, major change, scope or delivery model change). - Marketing and enrolment information (scope code, delivery modes, fees and learner support information) is confirmed as accurate and current. No training or assessment delivery may commence, and no amended materials may be used, until authorisation is granted.		
	a) Release controlled copies Issue a Release Email with links to controlled copies of approved materials and Release Notes. Staff are instructed to discard any local or printed copies and to use only controlled versions stored in the approved repository.	Admin Officer	Release email/memo; Distribution list
	b) Conduct assessor briefing or induction Conduct a PD briefing or documented induction covering assessment tools, benchmarks, academic integrity controls and reasonable adjustment processes. All assessors must attend the briefing or complete a documented induction prior to being allocated assessment duties.	Training Manager	PD attendance; slides/notes
3.3	Establish monitoring, moderation and continuous improvement - Establish ongoing monitoring arrangements, including progress checkpoints, in-delivery moderation of assessment decisions, and feedback capture from trainers and learners. - Monitoring activities are recorded in the Validation Schedule and Continuous Improvement Register. - For new delivery or significant maintenance changes, conduct a post-delivery evaluation following the first run to confirm assessment consistency, effectiveness and ongoing compliance, and schedule post-assessment validation as required.	Training Manager + Compliance	Monitoring plan; Moderation records; Validation schedule entry; CI entries Feedback summary

Step	Action	Responsibility	Records / Evidence
	Monitoring outcomes inform risk re-rating, validation scheduling and governance reporting.		

Sub Process: Design Assessment Plan & Tools (Methods, Benchmarks, Mapping, Integrity)

RELEVANT STANDARD(S):

Standards for Registered Training Organisations (RTOs) 2025	Outcome Standards addressed: • QA1 – Quality and integrity of assessment • QA4 – Governance, monitoring and continuous improvement
---	--

Procedure Overview

PURPOSE	To provide a repeatable method for creating an assessment plan and assessment tools that are mapped to unit requirements (KE/PE/AC), include clear assessor benchmarks, incorporate academic integrity controls, and are ready for validation and delivery. This sub-process applies to both New Course Development and Course Maintenance / Change , with the same controls applied regardless of the trigger.
ROLE UNDERTAKING TASK	Lead Assessor (Owner) – drafts plan and tools; maintains mapping matrices and benchmarks. Training Manager – ensures alignment with TAS and cohort needs. Compliance Officer – quality checks mapping and evidence requirements; coordinates validation. Industry Representative (advisory) – provides relevance and realism feedback as required.
INPUTS	Unit(s) of competency & assessment requirements; TAS draft; cohort profile & LLN/RA needs; industry engagement notes; organisational templates (Assessment Plan, Tool Design Template, Mapping Matrix, Assessor Guide, Assessment Record Book).
OUTPUTS	Approved Assessment Plan; complete tool set per unit/cluster (Student Instructions, Assessor Guide with benchmarks, instruments, coversheets/records); completed Mapping Matrix; Integrity statements & candidate declarations; validation pack ready for pre-assessment validation.
Procedure Overview	Plan: confirm scope, context, and assessment approach at unit/cluster level. Analyse & Design: design methods/tasks, create benchmarks and mapping, embed integrity and accessibility. Review: internal QA, validation and corrections. Implement: publish tools, brief assessors, and set recordkeeping.

Step	Phase	Action	Responsibility	Records / Evidence
1. Plan phase				
DA1.1	Plan	Identify unit(s) or cluster scope and assessment conditions, and confirm alignment with the approved TAS (mode, sequence and context). For maintenance activities, confirm whether proposed changes affect assessment scope or conditions.	Lead Assessor + Training Manager	Unit extract; TAS cross-check note
DA1.2	Plan	Define assessment purpose & timing (diagnostic/formative/summative); set points of collection and assessor:learner ratios.	Lead Assessor	Assessment Plan v0.1
DA1.3	Plan	Confirm cohort needs and reasonable adjustment pathways in accordance with the Reasonable Adjustment procedure, ensuring that adjustments do not compromise unit requirements.	Lead Assessor + Compliance	PTR/LLN results summary; RA procedure link
2. Analyse & Design phase				
DA2.1	Analyse & Design	Select assessment methods sufficient to generate valid, reliable, current and authentic evidence across all required KE/PE/AC and assessment conditions.	Lead Assessor	Assessment Plan methods table
DA2.2	Analyse & Design	Draft tasks and instruments for each method with realistic workplace context, clearly documenting timeframes, conditions, equipment, safety requirements and assessment conditions.	Lead Assessor	Draft instruments; Task briefs
DA2.3	Analyse & Design	Build Assessor Benchmarks (marking guides/observable behaviours) for each criterion; include sufficiency rules and re-assessment triggers. Assessors must not introduce additional criteria or exercise professional judgement outside the documented benchmarks.	Lead Assessor	Assessor Guide with benchmarks
DA2.4	Analyse & Design	Complete Mapping Matrix from each question/task to elements, performance criteria, performance & knowledge evidence, and assessment conditions.	Lead Assessor	Mapping Matrix v0.1
DA2.5	Analyse & Design	Draft Student Instructions (what to do, how to submit, timeframe, resources allowed, consequences, privacy).	Lead Assessor	Student Instructions draft

Step	Phase	Action	Responsibility	Records / Evidence
DA2.6	Analyse & Design	Embed academic integrity controls, including candidate declarations, identity verification, originality checks, collaboration rules and AI use statements, consistent with organisational policy.	Lead Assessor + Compliance	Integrity statement; Candidate Declaration; LMS settings
DA2.7	Analyse & Design	Design Accessibility & RA options that do not compromise unit requirements (e.g., oral response, larger font, assistive tech).	Lead Assessor	RA options list in tool
DA2.8	Analyse & Design	Prepare Assessment Record Books or coversheets that capture POA/ROE checks, attempts, outcomes, assessor feedback and signatures in accordance with record-keeping requirements.	Lead Assessor	Record Book template per unit
3. Review phase				
DA3.1	Review	Internal QA check (completeness of components, clarity, plain English, consistency with TAS).	Compliance Officer	QA checklist
DA3.2	Review	Pre-assessment Validation Conduct pre-assessment validation against the Principles of Assessment and Rules of Evidence and unit requirements. Validation focuses on the assessment design, including assessment methods, tasks, mapping, assessor benchmarks, clarity of instructions, sufficiency of evidence requirements, academic integrity controls and alignment to the Training and Assessment Strategy. Pre-assessment validation is conducted prior to release and use, and does not involve completed student assessment evidence.	Validator/Validation Panel — conducts pre-assessment validation as scheduled.	Validation checklist; minutes; action log
DA3.3	Review	Address validation actions, update versions, and file a CI entry if systemic issues are identified.	Lead Assessor + Compliance	Updated tools; Version log; CI Register entry
4. Implement phase				
DA4.1	Implement	Publish approved tools to the LMS or shared drive, lock previous versions, and update version control to ensure only current tools are accessible for delivery.	Compliance Officer	Tool pack; Version register

Step	Phase	Action	Responsibility	Records / Evidence
DA4.2	Implement	Brief assessors (tool walk-through, benchmarks practice, integrity checks, RA process).	Training Manager	Briefing attendance; slides/notes
DA4.3	Implement	Set up recordkeeping paths and retention requirements and prepare a moderation sampling plan to monitor assessment consistency during delivery.	Compliance Officer + Lead Assessor	Folder paths; Retention matrix; Moderation plan

APPENDICES

Appendix A — Assessment Plan (one page outline)	
This Assessment Plan summarises the assessment approach for planning, validation and briefing purposes and is completed prior to assessment tool release.	
Units/Cluster: ...	
Cohort & Context: ...	
Assessment Events:	Diagnostic ☐ Formative ☐ Summative ☒
Methods by unit: (e.g., Written knowledge test; Practical observation; Project; Third party)	
Conditions/Resources: ...	
Assessor to learner ratio & timing: ...	
RA/Integrity controls: ...	
Evidence to be collected (by method)	

Appendix B — Tool Components Checklist (tick before validation)

This checklist confirms assessment design completeness prior to pre-assessment validation. It does not require completed student assessment evidence.

- Student Instructions (scope, conditions, due dates, submission method)
- Assessor Guide (benchmarks, sufficiency rules, re-assessment triggers)
- Instruments/tasks (contextualised and realistic)
- Mapping Matrix completed (Elements, PC, KE, PE, conditions)
- Coversheets/Record Book (POA/ROE checks, attempts, feedback)
- Integrity controls (declaration, ID check, originality check, AI-use statement)
- Accessibility/RA options documented

Academic Integrity inserts (ready-to-paste)

Candidate Declaration (insert on every coversheet):

"I declare that the attached work is my own and that I have acknowledged all sources. I understand that plagiarism, collusion and the use of unauthorised assistance are breaches of SNS policy. I consent to the work being checked for authenticity."

Assessor authenticity checklist: ID verified ☐ Declaration signed ☐ Oral viva conducted (if triggered) ☐ Similarity check run ☐ Third-party evidence verified ☐

AI-use statement (add to student instructions):

"Unless explicitly permitted in this task, generative AI or automated assistance must not be used to produce assessment responses. If permitted, any AI use must be documented (tool, prompt, sections used). You remain responsible for accuracy and originality."

Course Development Request Form (Initiation – New Development Only)	
<i>This form is used to initiate New Course Development activities only and must be referenced in the Project Plan / Development Tracker.</i>	
A. Request Details	
Request type:	☐ New product ☐ Major revision ☐ Transition (superseded) ☐ Other:
Training product:	Qualification/Skill set/Unit code & title:
Driver:	☐ Industry request ☐ Audit finding ☐ Regulatory change ☐ CI opportunity ☐ Client contract ☐ Other:
Proposed start (first intake):	____ / ____ / _____ /
Campus	
Mode(s):	
B. Scope & Cohort	
Target cohort & entry requirements (summary):	
LLN/support considerations:	
C. Industry Engagement (initial)	
Stakeholders to consult (2–3):	
Method	☐ Interview ☐ Survey ☐ Panel
Planned dates:	
D. Resources & Personnel (initial view)	
Lead Trainer/Assessor:	
Backup:	
Under supervision?	☐ Y ☐ N
Facilities/equipment highlights:	
Learning resources (source/adaptation):	
E. Risk & Validation Planning	
Preliminary risk rating (tick):	☐ Low ☐ Medium ☐ High (see Risk Matrix)
Validation approach (initial – informs Project Plan risk settings)	☐ Panel ☐ External ☐ Moderation focus ☐ Sampling ↑
F. Approvals	
Training Manager: Name	Signature
	Date
Compliance Officer (noting): Name	Date
G. Document Control	
Generated ID:	SNS-CD-REQ-YYYY-### Repository path: /Curriculum/Requests/
Once approved: create Project Plan & add to CI/Validation schedules.	

Release Email Template (controlled copy notice)

Subject: RELEASE: [Course Code/Title] – Approved materials (v[version]) for delivery from [date]

To: Trainers/Assessors, Administration, Compliance, Marketing

Cc: CEO, RTO Manager

Hello team,

The following *approved* materials for [Course Code/Title] are now released for delivery starting [Go-live date].

What's included (controlled copies):

- TAS v[]
- Assessment tools v[] (Student Instructions, Assessor Guides with benchmarks, instruments, coversheets)
- Mapping matrices v[]
- Learning resources v[]
- Course Resource Checklist (completed)

Where to access (controlled repository):

[SharePoint/Path link] → 01–Assessments / 02–Student Resources / 03–Trainer Resources / 04–Mapping / 05–Validation / 06–TAS

What changed:

- [bullet 1]
- [bullet 2]

Actions required:

1. Review the attached Release Notes.
2. Attend the PD/Briefing on [date/time] (invite attached).
3. Discard any local or printed copies; use only controlled copies in the repository.

Academic integrity controls: ID verification, candidate declarations, and similarity checks are enabled/configured. See Assessor Guide §Integrity.

Questions? Reply to this email or contact [Training Manager name].

PD Briefing Agenda (60–90 min)

Session title: [Course Code/Title] – Assessor Tools & Benchmarks Briefing

Audience: Trainers/Assessors, Admin support

Facilitator: Training Manager | Co-facilitator: Lead Assessor / Compliance

Agenda

1. Welcome & objectives (5) – scope, go-live date, outcomes
2. What changed & why (10) – TAS shifts, delivery modes, resource highlights
3. Assessment plan walkthrough (15) – methods, events, timing, conditions
4. Tools deep-dive (20) – Student Instructions, instruments, Assessor Benchmarks (rubric practice, including non-negotiable benchmark application)
5. Mapping tour (10) – how KE/PE/AC are covered; common pitfalls
6. Academic integrity & RA (10) – declarations, ID checks, originality, AI statement, RA options & approvals
7. Recordkeeping & version control (5) – coversheets, attempts, archive paths
8. Moderation/validation plan (5) – in-delivery moderation dates; post-assessment validation schedule
9. Q&A and actions (10) – confirm support channels

Artifacts to share: slides, Release Notes, sample completed benchmark, mapping extract, attendance sheet.

VERSION CONTROL

Version Control Table					
Date	Summary of Modifications	Modified by	Version	Date of Implementation	Next Review Date
26 Oct 2025	Initial lifecycle diagram created to support Course Development and Review Procedure (Plan → Analyse & Design → Review → Implement). Aligned to Standards for RTOs 2015.	SNS College	1.0	26 Oct 2025	26 Oct 2026
23/12/2025	Updated terminology and sequencing to reflect single Project Plan / Development Tracker approach for new development and maintenance activities. Strengthened emphasis on readiness review and pre-assessment validation.	SNS College	2.0	23/12/2025	23/12/2026
25/01/2026	Major refinement to align with Standards for RTOs 2025. Reframed lifecycle to emphasise risk-based controls, validation as a governance gate, and continuous monitoring rather than linear delivery. Diagram confirmed as conceptual governance model (not procedural checklist).	SNS College	3.0	25/01/2026	25/01/2028
