

DOCUMENT AND VERSION CONTROL PROCEDURE

Standards for Registered Training Organisations (RTOs) 2025	• Outcome Standard 4.1 – Governance and Accountability • Outcome Standard 4.3 – Risk Management • Outcome Standard 4.4 – Monitoring and Continuous Improvement • Outcome Standard 1.3 – Assessment System Integrity • Outcome Standard 1.5 – Validation of Assessment
Procedure Overview	
PURPOSE	To define the required steps for creating, reviewing, approving, version controlling, publishing and archiving controlled documents within SNS College of Western Australia, ensuring: • accuracy and currency • traceability and audit readiness • regulatory compliance • protection of assessment integrity • controlled system-based governance This procedure operationalises the Document and Version Control Policy.
ROLE UNDERTAKING TASK	This procedure applies to: • CEO • RTO Manager / Compliance Manager • Document Owners • Training Manager • Administration Team • All RTO staff who use controlled documents
Procedure Overview	1. Identify the need for a new or updated document 2. Draft or revise the document 3. Assign or confirm Document Owner 4. Apply document ID and naming convention 5. Conduct document review 6. Determine change classification (Major / Moderate / Minor) 7. Obtain required approvals 8. Assign version number 9. Publish document to controlled repository 10. Archive superseded documents 11. Update SharePoint metadata 12. Generate live register snapshot (if required) 13. Communicate changes to staff

PROCEDURE

Step	Action	Responsibility	Evidence
Step 1 — Identify Need for New or Updated Document			
1.1	Identify requirement due to legislation change, audit finding, training product update, or internal CI.	Document Owner / RTO Manager	CI register entry, audit finding
1.2	Confirm whether document is controlled or non-controlled.	Compliance Manager	Document category list
Step 2 — Draft or Revise Document			
2.1	Draft new document using approved template OR revise existing version.	Document Owner	Draft document
2.2	Ensure content aligns with applicable legislation, Outcome Standards 2025, training products and governance framework.	Document Owner / RTO Manager	Review notes
Step 3 — Assign Document Owner			
3.1	Confirm who will maintain and review the document.	Compliance Manager	Document Control Register entry
3.2	Ensure document has a single accountable owner.	RTO Manager	Register
Step 4 — Apply Document ID & Naming Convention			
4.1	Assign document ID following the Document Naming Conventions Guide.	Compliance Manager	Document footer
4.2	Update version number to “Draft”.	Document Owner	Draft header
Step 5 — Review			
5.1	Review for accuracy, relevance, consistency, legislative alignment.	Document Owner	Review notes
5.2	Forward draft to Compliance Manager for quality check.	Document Owner	Email trail
5.3	If assessment-related → additional SME or Training Manager review required.	Training Manager	Validation notes
Step 6 — Determine Change Classification			
6.1	Classify change as Major / Moderate / Minor in accordance with Policy.	Document Owner	Change summary
6.2	If Major and assessment-impacting → ensure validation requirements under Outcome Standard 1.5 are met.	RTO Manager	Validation evidence
Step 7 — Approval			
7.1	Submit for approval.	Document Owner	Email request
7.2	CEO approves Major changes (policy, TAS, assessment system changes).	CEO	Approval email
7.3	RTO Manager approves Moderate/Minor updates.	RTO Manager	Signed approval
7.4	Update version number (1.0 / 1.1 / 1.01 etc.).	Compliance Manager	Version Control Table
Step 8 — Publish Current Version			
8.1	Upload approved document to SharePoint – Current Versions library.	Administration Team	Folder record
8.2	Confirm correct naming convention, required metadata completed, restricted editing permissions applied, and version history enabled.	Admin / IT	Permission logs

Step	Action	Responsibility	Evidence
8.3	Remove outdated versions from LMS, Teams, local drives and other storage locations.	Admin / Compliance	Confirmation record
Step 9 — Archive Superseded Versions			
9.1	Move superseded version to SharePoint Archive library (99-Archive).	Administration Team	Archive log
9.2	Update metadata status to “Superseded”.	Compliance Manager	Metadata record
9.3	Confirm only one version is marked “Current”.	Compliance Manager	Library view
Step 10 — Update SharePoint Metadata			
10.1	Confirm required metadata fields completed: Document Type, Version, Status, Document Owner, Approval Authority, Next Review Date.	Compliance Manager	Metadata view
10.2	Confirm search queries reflect updated “Current” version.	RTO Manager	Query result
Step 11 — Generate Live Register Snapshot (When Required)			
11.1	Filter SharePoint library: Status = Current.	Compliance Manager	Filtered view
11.2	Display metadata columns (Document Owner, Version, Approval Authority, Next Review Date).	Compliance Manager	View configuration
11.3	Export to Excel.	Compliance Manager	Export file
11.4	Record export date and retain as governance snapshot where required.	Compliance Manager	Dated register
Step 12 — Communicate Changes			
12.1	Notify relevant staff via email or LMS.	Compliance Manager	Notification
12.2	Update related documents (TAS, handbooks, tools) where impacted.	Training Manager	Updated documents
12.3	Record significant changes in Continuous Improvement Register.	Compliance Manager	CI entry

To maintain the integrity, security and currency of controlled documents:

- Controlled documents must not be stored on local drives (Desktop, Downloads, personal OneDrive or external storage devices).
- Controlled documents must not be distributed as editable email attachments. SharePoint links must be used to ensure access to the current approved version.
- Staff must verify that a document is marked Status: Current in SharePoint before using it for training, assessment, governance or compliance purposes.
- If a staff member identifies a document that appears outdated, duplicated or incorrectly stored, it must be reported immediately through the Continuous Improvement process.
- Uncontrolled copies must not be used for delivery, assessment or regulatory purposes.

These controls prevent version drift, protect assessment integrity, and support compliance with Outcome Standards 4.1 (Governance), 4.3 (Risk Management) and 4.4 (Monitoring and Continuous Improvement).

Document Naming Conventions Guide (SNS College)

To ensure consistency, traceability and audit readiness, all SNS College controlled documents must follow the naming conventions below.

1. Controlled Document Naming Format

[RTO Prefix] – [Document Type Code] – [Document Name] – [Version]

Example:

SNS – POL – Assessment-System – V2.0

2. Document Type Codes

Code	Meaning
POL	Policy
PRO	Procedure
TAS	Training and Assessment Strategy
TOOL	Assessment Tool (Master Suite)
MAP	Mapping Document
FRM	Form
REG	Register
GDE	Guide / Handbook
TMP	Template
BRF	Briefing Note
MKT	Marketing Document

3. Version Format

Version	Description
1.0	Major version (new document or significant regulatory change)
1.1, 1.2	Moderate update (content clarification or structural refinement)
1.01, 1.02	Minor update (typographical or formatting corrections only)
DRAFT	Unapproved draft version

WORK INSTRUCTION SharePoint Live Register Query & Compliance Check

Linked Procedure: Document and Version Control Procedure

Purpose: To generate a live governance snapshot of all current controlled documents using SharePoint metadata.

Scope: Compliance Manager, RTO Manager, Internal Audit, CEO (read-only access permitted).

1. Purpose of the Live Query

This work instruction defines the process for generating a real-time extract of all controlled documents currently marked Status = Current within SharePoint.

The exported file becomes the official governance snapshot as at the date of export.

This supports:

- Outcome Standard 4.1 – Governance and Accountability
- Outcome Standard 4.3 – Risk Management
- Outcome Standard 4.4 – Monitoring and Continuous Improvement

2. When to Run the Live Query

The live register query must be run:

- Quarterly (minimum)
- Prior to internal audit
- Prior to external audit
- Prior to Annual Declaration on Compliance
- When requested by CEO or governing persons
- When a systemic document control risk is identified

3. Generating the Live Register

Step 1 – Access the Controlled Library

1. Navigate to the SNS College SharePoint site.
2. Select 01-Controlled Documents (Current Versions) library.

Step 2 – Configure Visible Columns

Click Add Column → Show/Hide Columns

Ensure the following metadata fields are displayed:

- Document Name
- Document Type
- Version
- Status
- Document Owner
- Approval Authority
- Next Review Date

- Modified Date

Click Apply.

Step 3 – Apply Filter

1. Click the filter icon on the Status column.
2. Select:
 - ✓ Status = Current
3. Apply filter.

Only approved, active documents should now display.

Step 4 – Verify Governance Controls

Before exporting, confirm:

- No document is marked “Current” without an Approval Authority.
- All documents have a Version number.
- All documents have a Next Review Date.
- No duplicate documents appear.
- No “Draft” documents are visible.

If discrepancies are identified:

- Record issue in Continuous Improvement Register.
- Correct metadata before exporting.

Step 5 – Export Snapshot

1. Click Export → Export to Excel
2. Save file using naming convention:

SNS – REG – DocumentControlSnapshot – YYYYMMDD – V1.0

Example:

SNS – REG – DocumentControlSnapshot – 20260224 – V1.0

3. Save to:

Governance → Compliance Evidence → Document Register Snapshots

4. Status of the Exported File

The exported file:

- Is a governance snapshot only.
- Does NOT replace SharePoint as the authoritative register.
- Must not be edited.
- Must include export date in filename.

The export date constitutes the official record date for audit purposes.

5. Quarterly Compliance Review (Mandatory Check)

During quarterly review, the Compliance Manager must:

- Run live query
- Check for overdue review dates
- Identify documents nearing review (within 30 days)
- Confirm no orphaned documents (missing owner)
- Confirm no duplicate IDs
- Confirm no documents marked Current without approval

Findings must be:

- Recorded in Governance Meeting Minutes
- Entered into Continuous Improvement Register if required

6. Risk Indicators to Monitor

The following are document control risk triggers:

- Missing Approval Authority
- Missing Next Review Date
- Version mismatch (footer vs metadata)
- Multiple documents with same ID
- Excessive draft versions
- Unauthorised permission changes

Any identified risk must be logged immediately.

7. Governance Assurance Statement

The SharePoint live metadata query constitutes the official document register of SNS College. Manual registers are not authoritative and must not be maintained independently.

This ensures:

- Real-time traceability
- Version integrity
- Audit readiness
- System-based governance

VERSION CONTROL

Version Control Table					
Date	Summary of Modifications	Modified by	Version	Date of Implementation	Next Review Date
24/02/2026	Initial creation – Document and Version Control Procedure (including SharePoint governance model, metadata controls, live register query work instruction and naming conventions) aligned to Standards for RTOs 2025.	Compliance Manager	V1.0	24/02/2026	24/02/2027
